DETAILED ACTION

Allowable Subject Matter

1. Claims 2-13 and 17-18 (now amended 1-14) are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Beutnagel et al. (*AT&T Labs Publication*) disclose a method for rapid selection of speech units from a large speech corpus for concatenative speech synthesis in that some of speech units are concatenated in advance and are stored in a cache readily available for use at runtime. This helps reduce processing time for the system at runtime (*referring to reference*). Hunt et al. (IEEE Publication) disclose a method for selecting and concatenating units from large speech database in that units selected to produce a natural realization of a phoneme sequence predicted from text are based on computed concatenation cost between adjacent units (*referring to reference*). Both Beutnagel et al. and Hunt et al. fail to specifically disclose a pre-computed graph that includes a first part that encodes a sequence of segments and a corresponding sequence of unit labels for each of the source utterances, and a second part computed in advance of run-time when the target utterance is known that includes paths for coupling segments of the source utterances and encodes allowable transitions between segments of different source utterances and encodes a transition score for each of those transitions, and a selected path includes both first part and second part of the graph. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Beutnagel et al. and/or Hunt et al. in order to obtain the claimed invention. Therefore, claims 2-13 and 17-18 (now amended 1-14) are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
